

Senior Backend Engineer

Department: Engineering

Location: Taguig City, Metro Manila (Hybrid)

Employment Type: Full-time

Salary Range: PHP 140,000 – 190,000 per month

Application Deadline: October 31, 2026

JOB SUMMARY

We are looking for a Senior Backend Engineer to own the services behind our payments platform. You will work with a small product team and be responsible for reliability, performance and the quality of the APIs other teams build on.

KEY RESPONSIBILITIES

- Design, build and operate backend services in Go and PostgreSQL
- Lead the technical design of new payment flows, from proposal through rollout and monitoring of the release
- Review code and mentor two mid-level engineers
- Participate in a shared on-call rotation

MINIMUM QUALIFICATIONS

- At least 6 years of professional backend experience
- Strong command of SQL and relational data modelling
- Experience running production systems, required
- Kubernetes experience is a plus
- Exposure to fintech or payments preferred

BENEFITS

- HMO from day one, plus two dependents
- 20 days paid leave
- Annual learning budget of PHP 60,000

HOW TO APPLY

Send your CV to careers@example.com with the role title in the subject line.
